Assessment of product as allowed for use in organic production

Decision

Below listed product can be used in organic production certified according to KRAV ¹ private label standard as well as EU-organic ^{2,3} production. The basis for the assessment is based on submitted documentation reviewed by Kiwa Sverige AB.

Product:	Period of validity:
Eco-Plon Volcanic Minerals	2024-09-21

If the product or manufacturing process changes regarding raw materials/ substrate/ processing additives and/or production procedures, Kiwa Sverige AB shall immediately be notified. Kiwa Sverige AB will determine if a new assessment is needed.

Other

In 2022, a new analysis should be taken to confirm the heavy metal content and the maximum permitted dos in KRAV organic farming.

This decision is valid under circumstance that the terms in the KRAV private label as well as the EU regulations that the decision is made upon, are unchanged.
